

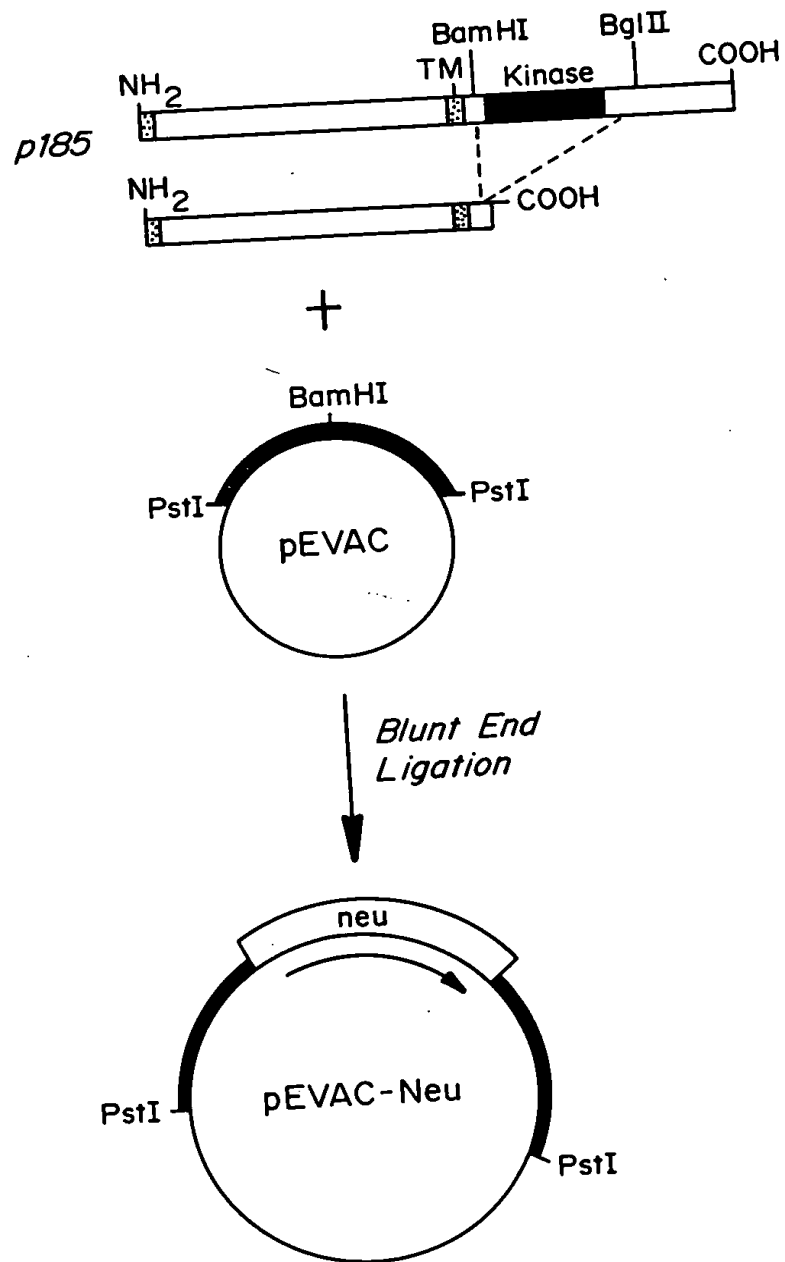

FIGURE 1

Western blot analysis showing p185 expression levels in various cell lines. The blot is probed with anti-p185 antibody. The lanes are labeled as follows:

Cell Line	Time	Lane 1	Lane 2	Lane 3	Lane 4	Lane 5	Lane 6
WR	4 weeks	1	2				
ABT9.4	3 weeks	1	2				
ABT9.4	4 weeks	1	2	3	4		
ABT9.4	5 weeks	1	2				

The blot shows a strong band at approximately 220 kDa in lanes 1-4, indicating p185 expression. A band at approximately 116 kDa is visible in lanes 1-4, and a band at approximately 92 kDa is visible in lanes 1-4. A band at approximately 66 kDa is visible in lanes 1-4. The p185 band is absent in lanes 5 and 6.
